PROFESSIONAL SUMMARY

Passionate Full-Stack Developer with experience in building scalable, high-performance applications. Skilled in Java, Python, and full-stack development, with strong problem-solving and communication skills. Quick learner, adaptable, and focused on delivering efficient, customer-centric solutions using modern SDLC practices.

CERTIFICATIONS AND TECHNICAL SKILLS

- Programming Languages:** Python, Java, JavaScript, SQL, Shell Scripting, HTML/CSS
- Frameworks & Libraries:** Spring Boot, Django, Express.js, React.js, Node.js
- Cloud & ETL:** Google Cloud Platform (GCP), AWS (EC2, S3), Informatica PowerCenter/IICS
- Databases:** PostgreSQL, Oracle, MySQL, MongoDB
- Tools & Technologies:** Git, Jenkins, Jira, UNIX/Linux, NumPy, Pandas, Matplotlib, Tableau
- Certifications:** Google Cloud Digital Leader Certification (Google), Data Scientist with Python Programming Certification (Data Camp), Java Programming Certification (Udemy)

EXPERIENCE

Bhajan Society Community | <https://www.fortwaynebhajansociety.org/> **JAN 2023 – JUN 2023**
Website Lead Developer **Fort Wayne, United States**

- Designed & developed a responsive web platform using Python (Django), HTML, CSS, and SQL, enhancing user engagement and community interactions.
- Successfully deployed the website, making it accessible to a broader audience and driving a 30% increase in website traffic.

Cognizant Technology Solutions | **Client: Ford Motor Company, United States** **Oct 2021 – Dec 2022**
Full-stack Developer **Hyderabad, India**

- Developed and optimized Spring Boot microservices to manage vehicle build rules, reducing latency by 25%.
- Designed RESTful APIs to enhance integration between key applications, improving data processing speed by 35%.
- Developed RESTful APIs for vehicle data processing, enabling seamless integration between key applications and enhancing data exchange efficiency by 35%.
- Enhanced UI/UX by implementing React.js and JSP/JSF, reducing page load times and improving the experience for 50K+ monthly users.
- Reduced production defects by 30% through rigorous unit testing (JUnit, ALM) and CI/CD integration.
- Worked in Agile teams, leading sprint planning and backlog refinement in Jira, ensuring continuous delivery.

Tech Mahindra Limited | **Client: Nissan Motor Corporation, United States** **Nov 2020– Sep 2021**
Software Engineer **Chennai, India**

- Developed and enhanced Java-based features and RESTful APIs for vehicle diagnostics & tracking systems, improving data accuracy by 40%.
- Automated manual workflows using Python scripts, reducing operational effort by 40% in vehicle maintenance reporting.
- Developed Unix/Linux shell scripts for automated data backups, log analysis, and system monitoring, reducing manual intervention by 30%.
- Processed and transformed 1M+ records daily using Python and Informatica, reducing ETL failures by 35% and improving data pipeline efficiency.
- Collaborated directly with stakeholders to translate business needs into cost-effective, scalable software features, reducing operational costs.

TechnoTran | **Intern** **Jul 2018 – Sep 2018**
Associate Software Engineer **Andhra Pradesh, India**

- Developed IoT-driven home automation using Python and Raspberry Pi, optimizing efficiency by 15%.
- Built Python-based automation scripts to enhance device communication, improving reliability by 25%.
- Debugged and optimized system performance, increasing overall system reliability by 20%

EDUCATION

Purdue University (3.9 GPA) **Jan 2023 – Dec 2024**
Master of Science in Computer Science **Indiana, United States**
