

Swetha Sri Jaladanki

Software Engineer – Full-Stack • Java Full-Stack Developer • Full-Stack Developer

(260)2469947 | jswethasri6@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Pittsburgh, USA | Open to relocate

PROFESSIONAL SUMMARY

Passionate Full-Stack Developer with hands-on experience in building scalable, high-performance applications. Skilled in Java, Python, React.js, and SQL with strong problem-solving and communication abilities. A quick learner and adaptable team player focused on delivering efficient, customer-centric solutions using best practices in SDLC and Agile development.

CERTIFICATIONS AND TECHNICAL SKILLS

- Programming Languages:** Java, Python, JavaScript,, SQL, Shell Scripting, HTML/CSS
- Libraries and Frameworks:** Spring Boot, Hibernate , Django, Express.js, React.js, Node.js
- Cloud :** Google Cloud Platform (GCP), AWS (EC2, S3), Docker, Kubernetes, OpenShift
- Databases:** PostgreSQL, Oracle, MySQL, MongoDB, T-SQL
- ETL/Data/Analytics :** Informatica PowerCenter/IICS, NumPy, Pandas, Matplotlib, Tableau
- Tools :** Git, Bitbucket, Jenkins, Jira, JUnit, UNIX/Linux
- Certifications:** Google Cloud Digital Leader Certification (Google), Data Scientist with Python Programming Certification (Data Camp), Java Programming Certification (Coursera)

EXPERIENCE

Bhajan Society Community | <https://www.fortwaynebhajansociety.org/>

JAN 2023 – JUN 2023

Software DeveloperFort Wayne, United States

- Designed and developed a responsive web platform using Python (Django), HTML, CSS, and SQL, enhancing user engagement and community interactions.
- Implemented secure authentication and robust data validation to ensure safe user interactions.
- Increased global traffic by 30% post-deployment through improved accessibility and UI enhancements.

Cognizant Technology Solutions | Client: Ford Motor Company, United States

Oct 2021 – Dec 2022

Full-stack DeveloperHyderabad, India

- Developed and optimized Spring Boot microservices for vehicle build rules, reducing API latency from 700ms to 500ms.
- Created REST APIs to manage vehicle data flow, enhancing inter-application integration and reliability.
- Redesigned frontend with React.js and JSP/JSF, improving UX for over 50,000+ monthly users.
- Reduced production issues by 30% using JUnit and CI/CD integration via Jenkins.
- Led sprint planning and backlog refinement using Jira, aligning delivery milestones with stakeholder goals.

Tech Mahindra Limited | Client: Nissan Motor Corporation, United States

Nov 2020– Sep 2021

Software EngineerChennai, India

- Built Java-based APIs for vehicle diagnostics and tracking systems, improving data precision by 40%.
- Integrated Kafka to streamline asynchronous processing for high-volume event data.
- Automated vehicle maintenance reporting with Python scripts, saving 40% in manual effort.
- Developed Unix shell scripts for automated backups and monitoring to reduce manual interventions.
- Processed over 1M+ records/day using Python and Informatica, minimizing ETL failure rates by 35%.
- Collaborated directly with stakeholders to translate business needs into cost-effective, scalable software features, reducing operational costs

TechnoTran | Intern

Jul 2018 – Sep 2018

Associate Software EngineerAndhra Pradesh, India

- Built **IoT-based home automation** using Python and Raspberry Pi, increasing device efficiency by **15%**.
- Created Python automation scripts for device communication, improving reliability by **25%**.
- Improved system stability by **20%** through debugging and performance tuning.

EDUCATION

Purdue University (3.9 GPA)

Jan 2023 – Dec 2024

Master of Science in Computer ScienceIndiana, United States
